

ON BOARD LADY ATTENDANT

Increased Safety

A female attendant can help ensure a safe environment for students, providing supervision and managing any potential issues or conflicts.

Communication with Parents

A lady attendant serves as the point of contact for parents, helping to address concerns or provide updates about their children's safety.

First Aid and Health Support

Having someone trained in first aid can be beneficial in case of minor injuries or health issues.

Parental Peace of Mind

Parents can feel more secure knowing that their children are being monitored while traveling to and from school.

AIS 140 GPS DEVICE

The AIS 140 GPS device typically refers to a specific model used for tracking and navigation which is approved by RTO.

Real-Time Tracking

Provides live location tracking, alerts when the bus enters or exits specified areas.

Route History

Records and displays the historical route taken.

UPCOMING RFID ATTENDANCE SYSTEMS

RFID attendance systems use RFID technology to automate and streamline the process of tracking attendance. Each student is assigned an RFID ID card that contains unique identification information.

Real-Time Tracking

Attendance is recorded in real time. Reduces human error associated with manual attendance tracking.

Time Efficiency

Speeds up the boarding process, allowing for quicker boarding and de-boarding.

ADVANTAGES OF SCHOOL TRANSPORT

Benefits	School Transport	Private Cars/Vans
Live Tracking (RTO Approved GPS Devices)	✓	✗
CCTV Cameras	✓	✗
RFID Attendance System	✓	✗
Trained Lady Attendants	✓	✗
Safety Kit (First Aid / Fire Extinguishers etc.)	✓	✗
Speed Governor (up to 40km/hr)	✓	✗
RTO Approved Buses	✓	✗

Accountability

School-provided transport ensures greater accountability, with direct oversight of drivers, vehicles, routes, and schedules. Third-party vans often lack the same level of supervision and control.

Consistency

School transport typically follows a fixed schedule and route, ensuring consistency and reliability for students and parents. Which is helpful for families with busy schedules. Private vans may not always offer the same level of consistency or reliability.

Integration with School Activities

School transport is better integrated with school activities and events. Ensuring that transportation needs are met for all students participating in school-related functions, field trips and events.

Social Interaction

During the commute, children have the opportunity to interact and bond with their peers, creating meaningful connections. This shared experience not only strengthens friendships but also promotes Team Spirit.

CCTV CAMERAS

Comprehensive Coverage

With cameras can focus on the complete bus with front views, ensuring complete surveillance.

Enhanced Safety

Cameras can deter inappropriate behaviour among students, bullying or misconduct that may occur on the bus.
